Dabaco Group would like to explain the reason why the consolidated profit after tax in the third quarter of 2026 decreased by VND 142,786 million compared to the same period last year as follows:

In the third quarter of 2026, the Group synchronously implemented solutions regarding product structure, product quality, market policies, and optimization of production and business activities. As a result, the sales volume of animal feed of the companies within the Group increased, leading to an increase in animal feed revenue and profit compared to the same period last year.

In addition, in the third quarter of 2026, the production and sales volume of the vegetable oil company increased. Consequently, the revenue and profit of the vegetable oil company increased by 303% and 320% respectively compared to the same period last year.

However, in the third quarter of 2026, the price of live pigs decreased. Accordingly, both revenue and profit of the livestock breeding companies decreased compared to the same period last year.

The Company would like to provide this explanation for the information of the SSC, HOSE, shareholders, and investors.
