- Net profit after tax on the Consolidated Financial Statements for the third quarter of 2026 recorded a loss of VND 6,042,584,724, representing a decrease of VND 6,187,633,724 (equivalent to a 4,265.89% decline) compared to the same period last year, shifting from profit to loss. This was mainly driven by a sharp drop in net revenue from sales and service rendering as well as financial income, coupled with mounting pressure from general and administrative expenses. Additionally, a significant contraction in the Company's trading securities portfolio further contributed to the decline in post-tax profit and the shift from profit to loss compared to the same period last year.

- Net profit after tax on the Separate Financial Statements for the third quarter of 2026 recorded a loss of VND 3,277,125,300, representing a decrease of VND 41,330,424,792 (equivalent to a 108.61% decline) compared to the same period last year, shifting from profit to loss. The main reason was a simultaneous drop across key revenue streams; specifically, net revenue from sales and service rendering was not incurred during the period, whereas the same period last year recorded a significant figure. Additionally, financial income fell sharply, combined with higher financial expenses compared to a negative expense recorded in the same period last year.
